

POUF COLLECTION

PRODUCT INFO

POUF COLLECTION

Design by ferm LIVING

Contrasts are not only captivating to the eye but will also bring engaging dimensions to a room.

The poufs are in themselves a graphic element, which combines softness with a modern interior built up around simple principles. The rounded lines shape the distinct design in line with our fascination of geometry and emphasise the simple and natural form, which produces a more organic expression. The poufs are upholstered in a high-quality high pile velvet from Febrik or faded velvet from Nevotex, creating an exclusive and durable seat. They are available in four different geometrical shapes as well as a variety of colours.

PRODUCT INFO

Product type: Pouf for indoor use.
Suitable for contract sales apart from UK

Country of origin: Lithuania

Dimensions & Weight:
Small: Ø 45 x H 40 cm - 9.2 kg
Medium - I: W 90 x H 40 x D 42 cm - 16.1 kg
Medium - II: W 85 x H 40 x D 43 cm - 16.1 kg
Large: Ø 90 x H 40 cm - 23.1 kg

Construction: Chipboard frame with rubber belts.
T45/60 foam and ovata 200 fiber padding.
Wooden feet with felt patches.

Material: High Pile Velvet: Gentle by Febrik
Composition: 60% Wool,
20% polyamide, 20% polyester.
Martindale: 80.000 - Light fastness: 4

Composition: 50% Acrylic,
40% polyester, 10% viscose
Martindale: 60.000 - Light fastness: 5

Colours: Dark Green, Dark Blue, Dark Grey, Bordeaux,
Chocolate, Beige 26, Mokka 6, Forest 3, Ocean 42,
Concrete 17

Assembly: Delivered fully assembled

CARE INSTRUCTIONS

General: Regular cleaning ensures that the upholstery fabric looks nice and prolongs its life. Velvet textiles should be vacuumed regularly to avoid dust to settle in the textile. Marks in velvet can easily occur, due to pressure from sitting, body moisture and air humidity. These are all typical properties and it cannot be perceived as a defect. However you can minimize this effect by treating the velvet with a steamer. It will raise the velvet fibers again. If a steamer is not available, a damp cloth can be applied on the area overnight, which will restore the fibers. The same result can be achieved by spraying a small amount of demineralized water on the area at a distance of 20 cm and letting it dry overnight.

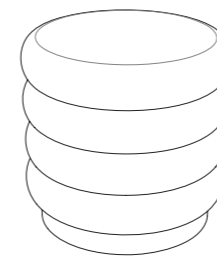

It is recommended to treat the entire surface to avoid colour differences. For daily cleaning brush of the dirt gently. Be careful not to damage it with sharp points. If a hole occurs, this might result in damaging the fabric. Therefore it is recommended to be careful with shoes, jeans and sharp objects. Remember to protect your furniture from direct sunlight and heat.

Gentle by Febrik: Professional dry clean only

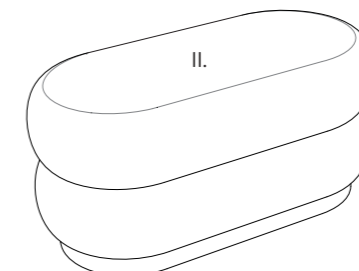

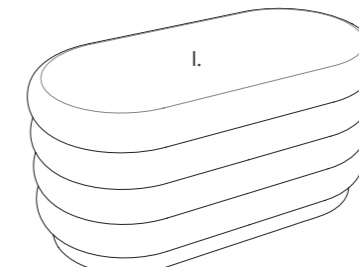

Eros by Nevotex: Professional dry clean only

Removal of stains: We do not recommend washing velvet, but dry clean only. For stains we recommend to contact a professional upholstery cleaner.
